Academic Council
held on 15.11.2023*

APPENDIX – BE

MADURAI KAMARAJ UNIVERSIT

(University with Potential for Excellence)

B.Sc.Computer Science

(Data Science and Analytics)

CHOICE BASED CREDIT SYSTEM REVISED SYLLABUS

(With effect from 2023-24)

SCHEME OF EXAMINATIONS, REGULATIONS AND SYLLABUS

1. Course objectives :

- To prepare the students to manage the software components in a computer independently and to be a Programmer.
- To motivate the students to take up higher studies in Computer Science and other streams.

2. Eligibility for Admission:

A candidate should have studied +2 level Mathematics as one of the subjects in the 10 +2 stream.

3. Duration of the Course:

The students shall undergo the prescribed course of study for a period of not less than three academic years (Six semesters).

4. Medium of Instruction: English.

5. Eligibility for the Degree:

- A Candidate shall be eligible for the award of the degree on completion of the prescribed course of study and passing all the prescribed external examinations.
- Attendance progress, internal examinations, conduct certificate from the Head of the Institution shall be required for taking the external examination.

- The passing minimum and the ranking are as per the existing rule of the Choice Based Credit System for the affiliated college of the University.

6. Consolidated Semester wise and Component wise Credit distribution

| Parts | Sem I | Sem II | Sem III | Sem IV | Sem V | Sem VI | Total Credits |
|--------------|-------|--------|---------|--------|-------|--------|---------------|
| Part I | 3 | 3 | 3 | 3 | - | - | 12 |
| Part II | 3 | 3 | 3 | 3 | - | - | 12 |
| Part III | 13 | 13 | 13 | 13 | 22 | 18 | 92 |
| Part IV | 4 | 4 | 3 | 6 | 4 | 2 | 23 |
| Part V | - | - | - | - | - | 1 | 1 |
| Total | 23 | 23 | 22 | 25 | 26 | 21 | 140 |

***Part I, II, and Part III components will be separately taken into account for CGPA calculation and classification for the under graduate programme and the other components. IV, V has to be completed during the duration of the programme as per the norms, to be eligible for obtaining the UG degree.**

| Methods of Evaluation | | |
|-----------------------------------|---|-----------|
| Internal Evaluation | Continuous Internal Assessment Test | 25 Marks |
| | Assignments | |
| | Seminars | |
| | Attendance and Class Participation | |
| External Evaluation | End Semester Examination | 75 Marks |
| | Total | 100 Marks |
| Methods of Assessment | | |
| Recall (K1) | Simple definitions, MCQ, Recall steps, Concept definitions | |
| Understand/Comprehend (K2) | MCQ, True/False, Short essays, Concept explanations, Short summary or Overview | |
| Application (K3) | Suggest idea/concept with examples, Suggest formulae, Solve problems, Observe, Explain | |
| Analyze (K4) | Problem-solving questions, Finish a procedure in many steps, Differentiate between various ideas, Map knowledge | |
| Evaluate (K5) | Longer essay/Evaluation essay, Critique or justify with pros and cons | |

| | |
|-------------------|---|
| Create(K6) | Check knowledge in specific or off-beat situations, Discussion, Debating or Presentations |
|-------------------|---|

1. Introduction

B.Sc. Computer Science (Data Science and Analytics)

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer science is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Computer Science can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer science has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science,

and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Science is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

Programme Outcome, Programme Specific Outcome and Course Outcome

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. The key core areas of study in Mathematics include Algebra, Analysis (Real & Complex), Differential Equations, Geometry, and Mechanics. The

Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

2. Programme Outcomes (PO) of B.Sc.degree programme in Computer Science(Data Science and Analytics)

- Scientific aptitude will be developed in Students
- Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the Computer Science & humanities stream.
- Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship.
- Students will possess basic subject knowledge required for higher studies, professional and applied courses.
- Students will be aware of and able to develop solution oriented approach towards various Social and Environmental issues.
- Ability to acquire in-depth knowledge of several branches of Computer Science and aligned areas. This Programme helps learners in building a solid foundation for higher studies in Computer Science and applications.

- The skills and knowledge gained leads to proficiency in analytical reasoning, which can be utilized in modelling and solving real life problems.
- Utilize computer programming skills to solve theoretical and applied problems by critical understanding, analysis and synthesis.
- To recognize patterns and to identify essential and relevant aspects of problems.
- Ability to share ideas and insights while seeking and benefitting from knowledge and insight of others.
- Mould the students into responsible citizens in a rapidly changing interdependent society.

The above expectations generally can be pooled into 6 broad categories and can be modified according to institutional requirements:

PO1: Knowledge

PO2: Problem Analysis

PO3: Design / Development of Solutions

PO4: Conduct investigations of complex problems

PO5: Modern tool usage

PO6: Applying to society

3. Programme Specific Outcomes of B.Sc. Degree Programme in Computer Science(Data Science and Analytics)

PSO1: Think in a critical and logical based manner

PSO2: Familiarize the students with suitable software tools of computer science and industrial applications to handle issues and solve problems in mathematics or statistics and real-time application related sciences.

PSO3: Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.

PSO4: Understand, formulate, develop programming model with logical approaches to a Address issues arising in social science, business and other contexts.

PSO5: Acquire good knowledge and understanding to solve specific theoretical and applied

problems in advanced areas of Computer science and Industrial statistics.

PO6: Provide students/learners sufficient knowledge and skills enabling them to undertake

further studies in Computer Science or Applications or Information Technology and its allied areas on multiple disciplines linked with Computer Science.

PO7: Equip with Computer science technical ability, problem solving skills, creative talent

and power of communication necessary for various forms of employment.

PO8: Develop a range of generic skills helpful in employment, internships& societal activities.

PO9: Get adequate exposure to global and local concerns that provides platform for further

exploration into multi-dimensional aspects of Computing sciences.

Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) can be carried out accordingly, assigning the appropriate level in the grids: (put tick mark in each row)

| | POs | | | | | | ... | PSOs | | |
|------|-----|---|---|---|---|---|-----|------|---|-----|
| | 1 | 2 | 3 | 4 | 5 | 6 | | 1 | 2 | ... |
| CLO1 | | | | | | | | | | |
| CLO2 | | | | | | | | | | |
| CLO3 | | | | | | | | | | |
| CLO4 | | | | | | | | | | |
| CLO5 | | | | | | | | | | |
| CLO6 | | | | | | | | | | |
| ... | | | | | | | | | | |

4. Highlights of the Revamped Curriculum

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive

examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.

- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Computer Science based problem solving skills are included as mandatory components in the ‘Training for Competitive Examinations’ course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest – Statistics with R Programming, Data Science, Machine learning. Internet of Things and Artificial Intelligence etc..

5. Value additions in the Revamped Curriculum:

| Semester | Newly introduced Components | Outcome / Benefits |
|-----------------|------------------------------------|---------------------------|
|-----------------|------------------------------------|---------------------------|

| | | |
|----------------------------|--|---|
| I | <p>Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning abstract Mathematics and simulating mathematical concepts to real world.</p> | <ul style="list-style-type: none"> • Instil confidence among students • Create interest for the subject |
| I, II, III, IV | <p>Skill Enhancement papers (Discipline centric / Generic / Entrepreneurial)</p> | <ul style="list-style-type: none"> • Industry ready graduates • Skilled human resource • Students are equipped with essential skills to make them employable • Training on Computing / Computational skills enable the students gain knowledge and exposure on latest computational aspects • Data analytical skills will enable students gain internships, apprenticeships, field work involving data collection, compilation, analysis etc. • Entrepreneurial skill training will provide an opportunity for independent livelihood • Generates self – employment • Create small scale entrepreneurs • Training to girls leads to women empowerment • Discipline centric skill will improve the Technical knowhow of solving real life problems using ICT tools |
| III, IV, V & VI | <p>Elective papers- An open choice of topics categorized under Generic and Discipline Centric</p> | <ul style="list-style-type: none"> • Strengthening the domain knowledge • Introducing the stakeholders to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature • Students are exposed to Latest topics on Computer Science / IT, that require strong mathematical background • Emerging topics in higher education / industry / communication network / health sector etc. are introduced with hands-on-training, facilitates designing of mathematical models in the respective sectors |

| | | |
|---|---|---|
| IV | Industrial Statistics | <ul style="list-style-type: none"> • Exposure to industry moulds students into solution providers • Generates Industry ready graduates • Employment opportunities enhanced |
| II year Vacation activity | Internship / Industrial Training | <ul style="list-style-type: none"> • Practical training at the Industry/ Banking Sector / Private/ Public sector organizations / Educational institutions, enable the students gain professional experience and also become responsible citizens. |
| V Semester | Project with Viva – voce | <ul style="list-style-type: none"> • Self-learning is enhanced • Application of the concept to real situation is conceived resulting in tangible outcome |
| VI Semester | Introduction of Professional Competency component | <ul style="list-style-type: none"> • Curriculum design accommodates all category of learners; ‘Mathematics for Advanced Explain’ component will comprise of advanced topics in Mathematics and allied fields, for those in the peer group / aspiring researchers; • ‘Training for Competitive Examinations’ –caters to the needs of the aspirants towards most sought - after services of the nation viz, UPSC, CDS, NDA, Banking Services, CAT, TNPSC group services, etc. |
| Extra Credits: For Advanced Learners / Honors degree | | <ul style="list-style-type: none"> • To cater to the needs of peer learners / research aspirants |
| Skills acquired from the Courses | | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill |

| FIRST YEAR I SEMESTER | | | |
|---|---|--|-------------------------------------|
| CourseCode: EC-1 | DISCRETE MATHEMATICAL STRUCTURES | | Credits: 3 |
| LectureHours:(L) Perweek: 4 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek: 4 |
| CourseCategory:Generic / Discipline Specific | Year : I Semester: I | AdmissionYear:2023-2024 | |
| Pre-requisite | Basic Knowledge on probability and mathematical logic | | |
| LearningObjectives:(for teachers: what they have to do in the class/lab/field) To understand the mathematical concepts like set theory, logics, number theory, combinatory and relations. | | | |
| CourseOutcomes:(for students: To know what they are going to learn) CO1: To gain knowledge on set theory. CO2: Able to understand different mathematical logics and functions. CO3: To get an idea on Permutations and Combinations. CO4: Understanding the different form of number theory. CO5: Able to understand Relations and its applications. | | | |
| Recap:(not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | | |

| Units | Contents | RequiredHours |
|---|--|---------------|
| I | SET THEORY - Introduction- set and Its Element – Set Description (Roster, Set Builder and cardinal number method) Types of Sets- Set Operations and Laws of set Theory. Partition of sets.Minsets-Countable and un Countable set. Algebra of sets andDuality | 12 |
| II | MATHEMATICAL LOGIC - Basic Logic and Proof, logical operations – Logic Propositional equivalence, Predicates and Quantities, Tautology-Contradiction-Methods of proofs(Direct and Indirect)- Function- Definition-Notation-Types of Function- Composition of Functions- | 12 |
| III | NUMBER THEORY - The Integers and Division, Integers and Algorithms,(Multiplication, Addition and Division - Sequences and Summations, Recursive algorithms, Program correctness. | 12 |
| IV | COMBINATORICS: - The basics of counting, the pigeonhole principle, Permutations and Combinations, Binomial coefficients, Generalized permutations and combinations | 12 |
| V | RELATIONS - Relations – Relations and their properties, Representing Relations, Closures of relations, Equivalence relations, Partial orderings-Recurrence Relations Binary Relations. | 12 |
| Extended Professional Component (is a part of internal component only, Not to be included | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |

| | | |
|---|---|--|
| in the External Examination question paper) | | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

| Course Category: Skill Enhancement Course | Year : I Semester: I | Admission Year: 2023-2024 |
| Pre-requisite | Basic skills in Computer operations | |
| Link to other Courses | NIL | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) <ul style="list-style-type: none"> • The major objective in introducing the Computer Skills course is to impart training for students in Microsoft Office which has different components like MS Word, MS Excel and Powerpoint. • The course is highly practice oriented rather than regular classroom teaching. • To acquire knowledge on editor, spreadsheet and presentation software. | | |
| Course Outcomes: (for students: To know what they are going to learn) <p>CO1: Understand the basics of computer systems and its components.</p> <p>CO2: Understand and apply the basic concepts of a word processing package.</p> <p>CO3: Understand and apply the basic concepts of electronic spreadsheet software.</p> <p>CO4: Understand and apply the basic concepts of database management system.</p> <p>CO5: Understand and create a presentation using PowerPoint tool.</p> | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours] | | |
| Units | Contents | Required Hours |
| I | Introductory concepts: Memory unit– CPU-Input Devices: Key board, Mouse and Scanner. Output devices: Monitor, Printer. Introduction to Operating systems & its features: DOS– UNIX– Windows. Introduction to Programming Languages. | 6 |
| II | Word Processing: Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker - Document formatting – Paragraph alignment, indentation, headers and footers, numbering; printing–Preview, options, merge. | 6 |
| III | Spreadsheets: Excel– opening, entering text and data, formatting, navigating; Formulas–entering, handling and copying; Charts– creating, formatting and | 6 |

| | | |
|---|--|----------|
| | printing, analysis tables, preparation of financial statements, introduction to data analytics. | |
| IV | Database Concepts: The concept of data base management system; Data field, records, and files, Sorting and indexing data; Searching records. Designing queries, and reports; Linking of datafiles; Understanding Programming environment in DBMS; Developing menu drive applications in query language (MS-Access). | 6 |
| V | Power point: Introduction to Power point - Features – Understanding slide type casting & viewing slides – creating slide shows. Applying special object – including objects & pictures – Slide transition – Animation effects, audio inclusion, timers. | 6 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC–CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

Learning Resources:

| FIRST YEAR I SEMESTER | | | |
|--|---|---|---------------------------------------|
| Course Code: FC | Problem Solving Techniques | | Credits: 2 |
| Lecture Hours: (L) Per week: 2 | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week | Total: (L+T+P) Per week: 2 |
| Course Category: Foundation Course | Year : I, Semester: I | Admission Year: 2023-2024 | |
| Pre-requisite | Basic of Problem-solving skills | | |
| Learning Objectives: | | | |
| <ul style="list-style-type: none"> • To understand the importance of algorithms and programs, and to know of the basic problem solving strategies. • To learn efficient strategies and algorithms to solve standard problems, thus laying a firm foundation for designing algorithmic solutions to problems. | | | |
| Course Outcomes: (for students: To know what they are going to learn) | | | |
| CO1: Understand the systematic approach to problem solving. | | | |
| CO2: Know the approach and algorithms to solve specific fundamental problems. | | | |
| CO3: Understand the efficient approach to solve specific factoring-related problems. | | | |
| CO4: Understand the efficient array-related techniques to solve specific problems. | | | |
| CO5: Understand the efficient methods to solve specific problems related to text processing. | | | |

| Understand how recursion works. | | |
|--|---|---------------|
| Recap: (notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | |
| Units | Contents | RequiredHours |
| I | Introduction: Notion of algorithms and programs – Requirements for solving problems by computer – The problem-solving aspect: Problem definition phase, Getting started on a problem, The use of specific examples, Similarities among problems, Working backwards from the solution – General problem-solving strategies - Problem solving using top-down design – Implementation of algorithms – The concept of Recursion. | 6 |
| II | Fundamental Algorithms: Exchanging the values of two variables – Counting - Summation of a set of numbers - Factorial computation - Sine function computation - Fibonacci Series generation - Reversing the digits of an integer – Base Conversion. | 6 |
| III | Factoring Methods: Finding the square root of a number – The smallest divisor of an integer – Greatest common divisor of two integers - Generating prime numbers – Computing the prime factors of an integer – Generation of pseudo-random numbers - Raising a number to a large power – Computing the n th Fibonacci number. | 6 |
| IV | Array Techniques: Array order reversal – Array counting or histogramming – Finding the maximum number in a set - Removal of duplicates from an ordered array - Partitioning an array – Finding the k^{th} smallest element – Longest monotone subsequence. | 6 |

| | | |
|---|--|---|
| V | <p>Text Processing and Pattern Searching: Text line length adjustment – Left and right justification of text – Keyword searching in text – Text line editing – Linear pattern search.</p> <p>Recursive algorithms: Towers of Hanoi – Permutation generation.</p> | 6 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

|---|---|--|--------------------------------------|
| CourseCode :CC3 | Data Structures & Algorithms | | Credits :5 |
| LectureHours:(L) Perweek : 5 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek : 5 |
| CourseCategory: Core | Year : I Semester: II | AdmissionYear:2023-2024 | |
| Pre-requisite | Basic knowledge in data and representations | | |
| Linksto otherCourses | | | |
| LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> • To impart the basic concepts of data structures and algorithms. • To acquaint the student with the basics of the various data structures and make the students knowledgeable in the area of data structures. • This course also gives insight into the various algorithm design techniques . | | | |
| CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1: To introduce the concepts of Data structures and to understand simple linear data structures. CO2: Learn the basics of stack data structure, its implementation and application. CO3: Use the appropriate data structure in context of solution of given problem and demonstrate a familiarity with major data structures. CO4: To introduce the basic concepts of algorithms CO5: To give clear idea on algorithmic design paradigms like Dynamic Programming, Backtracking, Branch and Bound | | | |
| Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | | |
| Units | Contents | | RequiredHours |
| I | INTRODUCTION TO DATA STRUCTURES: Data Structures: Definition- Time & Space Complexity,Arrays: Representation of arrays, Applications of arrays, sparse matrix and its representation. Linear list: Singly linked list implementation, insertion, deletion and searching operations on linear list . Circular linked list: implementation, Double linked list implementation, insertion, deletion and searching operations. Applications of linked lists- Dynamic Storage management. | | 15 |
| II | STACKS: Operations, array and linked representations of stack, | | 15 |

| | | |
|--|---|-----------|
| | stack applications, infix to postfix conversion, postfix expression evaluation, recursion implementation. | |
| III | QUEUES, TREES & GRAPHS: Queues: operations on queues, array and linked representations. Circular Queue: operations,, applications of queues. Trees: Definitions and Concepts- Representation of binary tree, Binary tree traversals (Inorder, Postorder , preorder), Binary search trees Graphs : Representation of Graphs- Types of graphs -Breadth first traversal – Depth first traversal- -Applications of graphs . | 15 |
| IV | INTRODUCTION TO ALGORITHMS: INTRODUCTION: Definition of Algorithms- Overview and importance of algorithms- pseudocode conventions, Asymptotic notations, practical complexities. Divide-and-Conquer: : General Method – Binary Search- Quick Sort- Merge Sort. Greedy Method: General method- Knapsack problem- Tree vertex splitting- Job sequencing with deadlines. | 15 |
| V | DYNAMIC PROGRAMMING, BACKTRACKING & BRANCH & BOUND :Dynamic programming: General method, Multistage Graphs, All pairs shortest path, Single source shortest path. Backtracking: General method, 8 Queens, Graph coloring, Hamiltonian cycle. Branch & Bound: General method, Travelling salesperson problem. | 15 |
| Extended Professional Component (is a part of internal component only, Not to be included in the | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |

| FIRST YEAR II SEMESTER | | | |
|--|--------------------------------------|--|-------------------------------------|
| CourseCode-EC-2 | NUMERICAL METHODS | | Credits 3 |
| LectureHours:(L) Perweek-4 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek: 4 |
| CourseCategory: Generic / Discipline Specific | Year : I Semester: II | AdmissionYear: 2023-2024 | |
| Pre-requisite | Basic Knowledge of mathematics | | |
| The main objectives of this course are: <ol style="list-style-type: none"> 1. To introduce the various topics in Numerical methods. 2. To make understand the fundamentals of algebraic equations. 3. To apply interpolation and approximation on examples. | | | |

| | | |
|--|--|-----------------------|
| 4. To solve problems using numerical differentiation and integration. | | |
| 5. To solve linear systems, numerical solution of ordinary differential equations. | | |
| Course Outcomes: (for students: To know what they are going to learn) | | |
| CO1: Know how to solve various problems on numerical methods | | |
| CO2: Use approximation to solve problems | | |
| CO3: Differentiation and integration concept are applied | | |
| CO4: Apply , direct methods for solving linear systems | | |
| CO5: Numerical solution of ordinary differential equations | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | FUNDAMENTALS OF ALGEBRAIC EQUATION: Solution of algebraic and transcendental equations-Bisection method – Fixed point iteration method – Newton Raphson method –linear system of equations – Gauss elimination method – Gauss Jordan method . | 12 |
| II | Iterative, Interpolation And Approximation: Iterative methods - Gauss Jacobi and Gauss Seidel – Eigen values of a matrix by Power method and Jacobi’s method for symmetric matrices. Interpolation with unequal intervals – Lagrange’s interpolation – Newton’s divided difference interpolation | 12 |
| III | INTERPOLATION WITH EQUAL INTERVAL: Difference operators and relations. -Interpolation with equal intervals – Newton’s forward and backward difference formulae. | 12 |

| | | |
|---|---|-----------|
| IV | NUMERICAL DIFFERENTIATION AND INTEGRATION: Approximation of derivatives using interpolation polynomials – Numerical integration using Trapezoidal, Simpson’s 1/3 rule. | 12 |
| V | INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS: Single step methods – Taylor’s series method – Euler’s method – Modified Euler’s method - RungeKutta method for solving(first, second , Third and 4th) order equations – Multi step methods | 12 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |

SECOND YEAR - III SEMESTER

| | | | |
|--|--|--|--------------------------------------|
| Course Code-CC5 | Python Programming | | Credits 5 |
| Lecture Hours:(L) Per week – 5 | Tutorial Hours:75 (T)per week | Lab Practice Hours: (P)per week | Total:(L+T+P) Per week: 5 |
| Course Category: Core | Year : II Semester: III | Admission Year: 2023-2024 | |
| Pre-requisite | Basic Knowledge of Programming concept | | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) | | | |
| <ul style="list-style-type: none"> • Describe the core syntax and semantics of Python programming language. • Discover the need for working with the strings and functions. • Illustrate the process of structuring the data using lists, dictionaries, tuples and sets. • Understand the usage of packages and Dictionaries | | | |
| Course Outcomes: (for students: To know what they are going to learn) | | | |
| CO1: Develop and execute simple Python programs | | | |
| CO2: Write simple Python programs using conditionals and looping for solving problems | | | |
| CO3: Decompose a Python program into functions | | | |
| CO4: Represent compound data using Python lists, tuples, dictionaries etc. | | | |
| CO5: Read and write data from/to files in Python programs | | | |

| Recap: (notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | |
|--|---|---------------------------|
| Units | Contents | RequiredH ours |
| I | Introduction: The essence of computational problem solving – Limits of computational problem solving-Computer algorithms-Computer Hardware-Computer Software-The process of computational problem solving-Python programming language - Literals - Variables and Identifiers - Operators - Expressions and Data types, Input / output. | 15 |
| II | Control Structures: Boolean Expressions - Selection Control - If Statement- Indentation in Python- Multi-Way Selection -- Iterative Control- While Statement- Infinite loops- Definite vs. Indefinite Loops- Boolean Flag. String, List and Dictionary, Manipulations Building blocks of python programs,Understandig and using ranges. | 15 |
| III | Functions: Program Routines- Defining Functions- More on Functions: Calling Value-Returning Functions- Calling Non-Value-Returning Functions- Parameter Passing - Keyword Arguments in Python - Default Arguments in Python-Variable Scope. Recursion: Recursive Functions | 15 |
| IV | Objects and their use: Software Objects - Turtle Graphics – Turtle attributes-Modular Design: Modules - Top-Down Design - Python Modules - Text Files: Opening, reading and writing text files – Database Programming: Connecting to a database, Creating Tables, INSERT, UPDATE, DELETE and READ operations, Transaction Control, Disconnecting from a database, String Processing - Exception Handling | 15 |
| V | Dictionaries and Sets: Dictionary type in Python - Set Data | 15 |

| | | |
|--|--|--|
| | type. Object Oriented Programming using Python: Encapsulation - Inheritance – Polymorphism. Python packages: Simple programs using the built-in functions of packages matplotlib, numpy, pandas etc. | |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC–CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |
| <p>Learning Resources:</p> <ul style="list-style-type: none"> • Recommended Texts <ol style="list-style-type: none"> 1. | SECOND YEAR - III SEMESTER | | | |
|--|---|-------------------------------------|---------------------------------|
| CourseCode: CC6 | CC6: Practical : Python Programming Lab | | Credits : 5 |
| LectureHours:(L) Perweek: | TutorialHours: (T)perweek | LabPractice Hours: 5 perweek | Total:(L+T+P) Perweek: 5 |
| CourseCategory:Core practical | Year&Semester: II Year III Semester | AdmissionYear:2023-2024 | |
| Pre-requisite | Basic of programming skill | | |
| LearningObjectives:(forteachers:whatttheyhavetodointheclass/lab/field) <ul style="list-style-type: none"> • Acquire programming skills in core Python. • Acquire Object-oriented programming skills in Python. • Develop the skill of designing graphical-user interfaces (GUI) in Python. • Develop the ability to write database applications in Python. • Acquire Python programming skills to move into specific branches. | | | |
| CourseOutcomes:(forstudents:Toknowwhatttheyaregoingtolearn) CO1: To understand the problem solving approaches CO2: To learn the basic programming constructs in Python CO3: To practice various computing strategies for Python-based solutions to real world problems CO4: To use Python data structures - lists, tuples, dictionaries. CO5: To do input/output with files in Python. | | | |
| Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | | |
| | List of Exercises: | | RequiredHours |
| | 1. Program to convert the given temperature from Fahrenheit | | 75 |

| | | |
|--|---|--|
| | <p>to Celsius and vice versa depending upon user's choice.</p> <p>2. Program to calculate total marks, percentage and grade of a student. Marks obtained in each of the five subjects are to be input by user. Assign grades according to the following criteria:</p> <p style="padding-left: 40px;">Grade A: Percentage ≥ 80 Grade B: Percentage ≥ 70 and < 80</p> <p style="padding-left: 40px;">Grade C: Percentage ≥ 60 and < 70 Grade D: Percentage ≥ 40 and < 60</p> <p style="padding-left: 40px;">Grade E: Percentage < 40</p> <p>3. Program, to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.</p> <p>4. Write a Python script that prints prime numbers less than 20.</p> <p>5. Program to find factorial of the given number using recursive function.</p> <p>6. Write a Python program to count the number of even and odd numbers from array of N numbers.</p> <p>7. Write a Python class to reverse a string word by word.</p> <p>8. Given a tuple and a list as input, write a program to count the occurrences of all items of the list in the tuple. (Input : tuple = ('a', 'a', 'c', 'b', 'd'), list = ['a', 'b'], Output : 3)</p> <p>9. Create a Savings Account class that behaves just like a BankAccount, but also has an interest rate and a method that increases the balance by the appropriate amount of interest (Hint:use Inheritance).</p> <p>10. Write a Python program to construct the following pattern, using a nested loop</p> <p style="padding-left: 100px;">*</p> <p style="padding-left: 100px;">**</p> | |
|--|---|--|

| | | |
|---|--|--|
| | <p style="text-align: center;">**** **** ***** **** *** ** *</p> <p>11. Read a file content and copy only the contents at odd lines into a new file.</p> <p>12. Create a Turtle graphics window with specific size.</p> <p>13. Write a Python program for Towers of Hanoi using recursion</p> <p>14. Create a menu driven Python program with a dictionary for words and their meanings.</p> <p>15. Devise a Python program to implement the Hangman Game.</p> | |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

| SECOND YEAR – III SEMESTER | | | |
|---|--|--|-------------------------------------|
| CourseCode –EC 3 | Probability and Statistics | | Credits 3 |
| LectureHours:(L) Perweek – 4 | TutorialHours: (T)perweek | LabPracticeHours: (P)perweek: | Total:(L+T+P) Perweek: 4 |
| CourseCategory: Elective Course 3 (Generic / Discipline Specific) | Year : II Semester: III | AdmissionYear: 2023-2024 | |
| Pre-requisite | Basic Knowledge of Mathematical foundation | | |

| <ul style="list-style-type: none"> • Learning Objectives:(for teachers: what they have to do in the class/lab/field) • Organizing and summarizing the data. Analyzing the data and drawing conclusions from it. Assessing the strengths of the conclusions and evaluating their uncertainty. • Define the principal concepts about probability. • Explain the concept of a random variable and the probability distributions. | | |
|---|--|-----------------------|
| <p>Course Outcomes:(for students: To know what they are going to learn)</p> <p>CO1: understand basic probability axioms and rules and the moments of discrete and continuous random variables as well as be familiar with common named discrete and continuous random variables</p> <p>CO2: - derive the probability density function of transformations of random variables and use these techniques to generate data from various distributions</p> <p>CO3: derive the marginal and conditional distributions of random variables, translate real-world problems into probability models</p> <p>CO4 :Analyze the different Statistical measures of data</p> <p>CO5: - test hypothesis of different types</p> | | |
| <p>Recap:(not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours)</p> | | |
| Units | Contents | Required Hours |
| I | Introduction to statistics – primary and secondary data – classification, tabulation and Diagrammatic Representation of statistical data – Bar-charts, Pie-diagrams – Graphical Representation of data – Histograms, Frequency polygon, Ogives. | 12 |
| II | Measures of dispersion – characteristics – coefficient of dispersion - Coefficient of variation-Moments – skewness and kurtosis – Pearson’s coefficient of skewness - Bowley’s coefficient of Skewness – Coefficient of skewness based upon moments. | 12 |
| III | Simple correlation – Karl Pearson’s coefficient of | 12 |

| | | |
|--|---|-----------|
| | correlation – correlation coefficient for A bivariate frequency distribution – Rank correlation – Regression lines of regression – Properties of regression coefficient | |
| IV | Events and sets – sample space – concept of probability – addition and multiplications Theorem on probability – conditional probability and independence of evens – Baye’s Theorem – concept of random variable – Mathematical Expectation. | 12 |
| V | Concept of sampling distributions – standard error – Tests of significance based on t, Chi- square and F distributions with respect to mean, variance. | 12 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/others to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

| Lecture Hours: (L) Per week | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week: 5 | Total: (L+T+P) Per week: 5 |
| Course Category: CC8 | Year: II Year Semester: IV | | Admission Year: 2023-2024 |

| | | |
|---|---|-----------------------|
| Pre-requisite | Basic Programming debugging skills | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) | | |
| <ul style="list-style-type: none"> To gain practical expertise in coding Core Java programs To become proficient in the use of AWT, Event Handling and Swing. | | |
| Course Outcomes: (for students: To know what they are going to learn) | | |
| CO1: Code, debug and execute Java program to solve the given problems | | |
| CO2: Implement multi-threading and exception-handling | | |
| CO3: Implement functionality using String and StringBuffer classes | | |
| CO4: Demonstrate Event Handling. | | |
| CO5: Create applications using Swing and AWT | | |
| Recap (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| | List of Exercises: | Required Hours |
| | <ol style="list-style-type: none"> Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer? Write a Java program to multiply two given matrices. Write a Java program that displays the number of characters, lines and words in a text? Generate random numbers between two given limits using Random class and print messages according to the range of the value generated. Write a program to do String Manipulation using Character Array and perform the following string operations: <ol style="list-style-type: none"> String length Finding a character at a particular position Concatenating two strings Write a program to perform the following string operations using String class: <ol style="list-style-type: none"> String Concatenation | 75 |

| | | |
|--|--|--|
| | <ul style="list-style-type: none"> b. Search substring c. To extract substring from given string <p>7. Write a program to perform string operations using StringBuffer class:</p> <ul style="list-style-type: none"> a. Length of a string b. Reverse a string c. Delete a substring from the given string <p>8. Write a Java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.</p> <p>9. Write a threading program which uses the same method as synchronously to print the numbers 1 to 10 using Thread 1 and to print 90 to 100 using Thread 2.</p> <p>10. Write a program to demonstrate the use of following exceptions.</p> <ul style="list-style-type: none"> a. ArithmeticException b. NumberFormatException c. ArrayIndexOutOfBoundsException d. NegativeArraySizeException <p>11. Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes?</p> <p>12. Write a program to accept text and change its size and font. Include bold and italic options. Use frames and controls.</p> <p>13. Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use adapter classes).</p> <p>14. Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.</p> <p>15. Write a Java program that simulates a traffic light. The</p> | |

| Pre-requisite | Basic knowledge on Data and its relations | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) | | |
| <ul style="list-style-type: none"> To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms. To understand the concepts of data base management system, design simple Database models To learn and understand to write queries using SQL, PL/SQL. | | |
| Course Outcomes: (for students: To know what they are going to learn) | | |
| CO1: Understand the various basic concepts of Data Base System. Difference between file system and DBMS and compare various data models. | | |
| CO2: Define the integrity constraints. Understand the basic concepts of Relational Data Model, Entity-Relationship Model. | | |
| CO3: Design database schema considering normalization and relationships within database. Understand and construct database using Structured Query Language. Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML). | | |
| CO4: Classify the different functions and various join operations and enhance the knowledge of handling multiple tables. | | |
| CO5: Learn to design Data base operations and implement using PL/SQL programs. Learn basics of PL/SQL and develop programs using Cursors, Exceptions | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course) [This is done during 2 Tutorial hours] | | |
| Units | Contents | Required Hours |
| I | Database Concepts: Database Systems - Data vs Information - Introducing the database - File system - Problems with file system - Database systems. Data models - Importance - Basic Building Blocks - Business rules - Evolution of Data models - Degrees of Data Abstraction | 9 |
| II | Design Concepts: Relational database model - logical view of data - keys - Integrity rules - relational set operators - data | 9 |

| | | |
|------------|---|----------|
| | dictionary and the system catalog - relationships -data redundancy revisited -indexes - codd's rules. Entity relationship model - ER diagram | |
| III | Normalization of Database Tables: Database tables and Normalization – The Need for Normalization –The Normalization Process – Higher level Normal Form. Introduction to SQL: Data Definition Commands – Data Manipulation Commands – SELECT Queries – Additional Data Definition Commands – Additional SELECT Query Keywords – Joining Database Tables. | 9 |
| IV | Advanced SQL: Relational SET Operators: UNION – UNION ALL – INTERSECT - MINUS.SQL Join Operators: Cross Join – Natural Join – Join USING Clause – JOIN ON Clause – Outer Join. Sub Queries and Correlated Queries: WHERE – IN – HAVING – ANY and ALL – FROM. SQL Functions: Date and Time Function – Numeric Function – String Function – Conversion Function | 9 |
| V | PL/SQL: A Programming Language: History – Fundamentals – Block Structure – Comments – Data Types – Other Data Types – Variable Declaration – Assignment operation – Arithmetic operators. Control Structures and Embedded SQL: Control Structures – Nested Blocks – SQL in PL/SQL – Data Manipulation – Transaction Control statements. PL/SQL Cursors and Exceptions: Cursors – Implicit Cursors, Explicit Cursors and Attributes – Cursor FOR loops – SELECT...FOR UPDATE – WHERE CURRENT OF clause – Cursor with Parameters – Cursor Variables – Exceptions – Types of Exceptions. | 9 |

| SECOND YEAR IV SEMESTER | | | |
|--|---|--|-------------------------------------|
| CourseCode-SEC-7 | Resource Management Techniques | | Credits : 2 |
| LectureHours:(L)perweek : 2 | TutorialHours (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek: 2 |
| CourseCategory:Skill Enhancement Course | Year&Semester: II Year IV Semester | | AdmissionYear:2023- 2024 |
| Pre-requisite | Basic Knowledge of Mathematics | | |
| LearningObjectives:(forteachers:whatttheyhavetodointheclass/lab/field) | | | |
| <ul style="list-style-type: none"> • Gaining knowledge about managing production processes. • How to run operations effectively. • Better understanding of modern production techniques. • Better understanding of quality management. | | | |

| Course Outcomes: (for students: To know what they are going to learn) | | |
|--|--|-----------------------|
| CO1: Define and formulate linear programming problems and appreciate their limitations. | | |
| CO2: Solve linear programming problems using graphical method | | |
| CO3: Solve linear programming problems using Simplex & Big-M methods | | |
| CO4: Solve Assignment Problems. | | |
| CO5: Solve Transportation problems | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | Development of OR: Definition of OR – Modeling - Characteristics and Phases - Tools, Techniques & Methods - scope of OR. Linear Programming Problem: Formulation - Slack & surplus variables | 6 |
| II | Linear Programming Problem: Formulation - Slack & surplus variables - Graphical solution of LPP. | 6 |
| III | Simplex Method: Computational Procedure - Big-M method . | 6 |
| IV | Mathematical formulation of assignment problem - Method for solving assignment problem. | 6 |
| V | Mathematical formulation of Transportation Problem: Methods for finding IBFS for the Transportation Problems. | 6 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/other to be solved (To be discussed during the Tutorial hour) | |

| THIRD YEAR V SEMESTER | | | |
|---|--|---|---------------------------------------|
| Course Code: CC9 | Software Engineering | | Credits: 4 |
| Lecture Hours: (L) Per week: 5 | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week | Total: (L+T+P) Per week: 5 |
| Course Category: Core | Year : III Semester: V | Admission Year: 2023-2024 | |
| Pre-requisite | Basic Knowledge on Software Applications | | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) • To understand the | | | |

| software engineering concepts and to create a system model in real life applications. | | |
|--|---|-----------------------|
| Course Outcomes: (for students: To know what they are going to learn) | | |
| CO1: Gain basic knowledge of analysis and design of systems | | |
| CO2: Ability to apply software engineering principles and techniques | | |
| CO3: Model a reliable and cost-effective software system | | |
| CO4: Ability to design an effective model of the system | | |
| CO5: Perform Testing at various levels and produce an efficient system. | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | Introduction: The software engineering discipline, programs vs. software products, why study software engineering, emergence of software engineering, Notable changes in software development practices, computer systems engineering. Software Life Cycle Models: Why use a life cycle model, Classical waterfall model, iterative waterfall model, prototyping model, evolutionary model, spiral model, comparison of different life cycle models. | 15 |
| II | Requirements Analysis and Specification: Requirements gathering and analysis, Software requirements specification (SRS). Software Design: Good software design, cohesion and coupling, neat arrangement, software design approaches, object- oriented vs function-oriented design | 15 |
| III | Function-Oriented Software Design: Overview of SA/SD methodology, structured analysis, data flow diagrams (DFD's), structured design, detailed design. User-Interface design: Characteristics of a good interface; basic concepts; | 15 |

| | | |
|---|--|-----------|
| | types of user interfaces; component based GUI development, a user interface methodology. | |
| IV | <p>Coding and Testing: Coding; code review; testing; testing in the large vs testing in the small; unit testing; black-box testing; white-box testing; debugging; program analysis tools; integration testing; system testing; some general issues associated with testing.</p> <p>Software Reliability and Quality Management: Software reliability; statistical testing; software quality; software quality management system; SEI capability maturity model; personal software process.</p> | 15 |
| V | <p>Computer Aided Software Engineering: CASE and its scope; CASE environment; CASE support in software life cycle; other characteristics of CASE tools; towards second generation CASE tool; architecture of a CASE environment.</p> <p>Software Maintenance: Characteristic of software maintenance; software reverse engineering; software maintenance process models; estimation of maintenance cost;</p> | 15 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/other to be solved (To be discussed during the Tutorial hour) | |

| | | |
|--|--|--|
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferable Skill | |
| <p>Learning Resources:</p> <ul style="list-style-type: none"> • Recommended Texts <ol style="list-style-type: none"> 1. Rajib Mall, Fundamentals of Software Engineering, Fifth Edition, Prentice-Hall of India, 2018 • Reference Books <ol style="list-style-type: none"> 1. Richard Fairley, Software Engineering Concepts, Tata McGraw-Hill publishing company Ltd, Edition 1997. 2. Roger S. Pressman, Software Engineering, Seventh Edition, McGraw-Hill. James A. Senn, Analysis & Design of Information Systems, Second Edition, McGraw-Hill International Editions. <p>Web resources: Web resources from NDL Library, E-content from open-source libraries</p> | | |

| THIRD YEAR V SEMESTER | | | |
|---|---|---|---------------------------------------|
| Course Code: CC10 | Data Preparation and Visualization | | Credits: 4 |
| Lecture Hours: (L) Per week: 5 | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week | Total: (L+T+P) Per week: 5 |
| Course Category: Core | Year : III Semester: V | Admission Year: 2023-2024 | |
| Pre-requisite | | | |
| <p>Learning Objectives: (for teachers: what they have to do in the class/lab/field)</p> <ul style="list-style-type: none"> • Good data preparation allows for efficient data analysis, limits errors and inaccuracies that can occur to data during processing, and makes all processed data more accessible to users • Data visualization helps to tell stories by curating data into a form easier to understand, highlighting the trends and outliers | | | |

| Course Outcomes: (for students: To know what they are going to learn) | | |
|--|---|-----------------------|
| CO1: To learn about data preprocessing | | |
| CO2: To learn about data preparation tools | | |
| CO3: To learn about data exploration & NOSQL | | |
| CO4: To learn about data transformation & data blending | | |
| CO5: To learn about plotting various charts & graphs | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | Data Preparation: Importing Data- Text files- Excel spreadsheets- Statistical packages - Databases - Cleaning Data : Selecting variables - Selecting observations - Creating/Recoding variables - Summarizing data - Using pipes - Reshaping data - Missing data - Introduction to ggplot2 - ggplot- geoms - grouping scales - facets - labels- themes - Placing the data and mapping options- Graphs as objects. | 15 |
| II | Data Preparation Basics - Data Preparation Defined - Historical Perspective – How Did We Get Here? - The Need for Self-Service Data Preparation - Historical Perspective - Introduction to Data Preparation Tools : Types of tools o Programming/scripting vs. visual interface - Standalone vs. integrated into analytics platforms - Cloud, on-premises, and hybrid deployment - Machine learning and data preparation - Users of Data Preparation Tools : Data scientists - Data engineers - Business analysts - Data analysts o Information workers - Data Preparation in Analytics Architecture- | 15 |

| | | |
|------------|---|-----------|
| | Data Preparation and Analytics Life Cycle: Continuous exploration and discovery - Iterative and adaptive. | |
| III | <p>Data Discovery - Data Sources : Enterprise databases - Local data - Desktop data - Cloud data - Web data - Files - NoSQL - Geospatial - Media -</p> <p>Data Sourcing : Choosing data sources - Physical data source connections - Virtual data source connections - Data Exploration : Understanding content - Estimating quality - Discovering patterns - Discovering data types - Discovering data structure - Discovering data relationships - Data enrichment opportunities - Developing data profiles - Capturing metadata</p> | 15 |
| IV | <p>Data Transformation -</p> <p>The Scope of Data Preparation: Improving Data - Standardization and conforming - Cleansing and quality - De-duplication - Enriching Data : Derivation - Appending - Aggregation - Formatting Data - Aggregation - Sorting and sequencing - Pivoting / de-pivoting - Sampling and filtering - Masking sensitive data - Constructing records -</p> <p>Data Blending: Blending defined - Blend vs. join - Blending vs. warehousing.</p> | 15 |
| V | <p>Univariate Graphs - Categorical : Bar Chart - Pie Chart - TreeMap - Quantitative - Histogram - Kernel Density plot - Dot Chart - Bivariate Graphs - Categorical vs. Categorical : Stacked bar chart - Grouped bar chart - Segmented bar chart - Improving the color and labeling - Other plots - Quantitative vs. Quantitative : Scatterplot - Line plot - Categorical vs. Quantitative : Bar chart (on summary statistics) - Grouped kernel density plots - Box plots - Violin plots - Ridgeline plots - Mean/SEM plots - Strip plots - Beeswarm Plots - Cleveland Dot Charts - Multivariate Graphs -</p> | 15 |

| | | |
|---|--|--|
| | Grouping– Faceting. | |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/other to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferable Skill | |

| THIRD YEAR VI SEMESTER | | | |
|--|-------------------------------------|---|---------------------------------------|
| Course Code: CC13 | Computer Networks | | Credits: 4 |
| Lecture Hours: (L) Per week: 6 | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week | Total: (L+T+P) Per week: 6 |
| Course Category: Core | Year: III Semester: VI | Admission Year: 2023-2024 | |
| Pre-requisite | Basic Knowledge on Networking | | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) <ul style="list-style-type: none"> • To understand the concept of Data communication and Computer network • To get a knowledge on routing algorithms. • To impart knowledge about networking and inter networking devices <p>To gain the knowledge on Security over Network communication</p> | | | |

| Course Outcomes: (for students: To know what they are going to learn) | | |
|--|---|-----------------------|
| CO1: To Understand the basics of Computer Network architecture, OSI and TCP/IP reference models | | |
| CO2: To gain knowledge on Telephone systems and Satellite communications | | |
| CO3: To impart the concept of Elementary data link protocols | | |
| CO4: To analyze the characteristics of Routing and Congestion control algorithms | | |
| CO5: To understand network security and define various protocols such as FTP, HTTP, Telnet, DNS | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | Introduction – Network Hardware – Software – Reference Models – OSI and TCP/IP Models – Example Networks: Internet, ATM, Ethernet and Wireless LANs - Physical Layer – Theoretical Basis for Data Communication - Guided Transmission Media | 18 |
| II | Wireless Transmission - Communication Satellites – Telephone System: Structure, Local Loop, Trunks and Multiplexing and Switching. Data Link Layer: Design Issues – Error Detection and Correction. | 18 |
| III | Elementary Data Link Protocols - Sliding Window Protocols – Data Link Layer in the Internet - Medium Access Layer – Channel Allocation Problem – Multiple Access Protocols – Bluetooth | 18 |
| IV | Network Layer - Design Issues - Routing Algorithms - Congestion Control Algorithms – IP Protocol – IP Addresses – Internet Control Protocols. | 18 |
| V | Transport Layer - Services - Connection Management - | 18 |

| | | |
|--|---|--|
| | Addressing, Establishing and Releasing a Connection – Simple Transport Protocol – Internet Transport Protocols (ITP) - Network Security: Cryptography. | |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC – CSIR/GATE/TNPSC/other to be solved (To be discussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferable Skill | |
| <p>Learning Resources:</p> <ul style="list-style-type: none"> • Recommended Texts <ol style="list-style-type: none"> 1. A. S. |--|---|--|-------------------------------------|
| CourseCode: CC-14 | Big Data Analytics | | Credits: 4 |
| LectureHours:(L) Perweek : 6 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek: 6 |
| CourseCategory:Core | III Year VI Semester | | AdmissionYear: 2023-2024 |
| Pre-requisite | Basic knowledge on Data handlings | | |
| LearningObjectives:(forteachers:whattheyhavetodointheclass/lab/field) 1. To know the fundamental concepts of big data and analytics. 2. To explore tools and practices for working with big data. | | | |
| CourseOutcomes:(forstudents:Toknowwhattheyaregoingtolearn) CO1: Work with big data tools and its analysis techniques. CO2: Analyze data by utilizing clustering and classification algorithms. CO3: Learn and apply different mining algorithms and recommendation systems for large volumes of data. CO4: Perform analytics on data streams. CO5: LearnNoSQL databases and management. | | | |
| Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | | |
| Units | Contents | | Required Hours |
| I | Data Explosion and Big Data Analytics: An Overview: Introduction, Evolution of Database Technology and Big Data, Elements of Big Data, Big Data System Components, Big Data Analytics – Data Analytics. Types of Big Data Analytics, Applications of Big Data Technology, Challenges and Skills required with Big Data Technology. | | 18 |
| II | Analytical Theory: Introduction about Classification Algorithms, Regression Techniques, Domain Specific Analytic Techniques: In | | 18 |

| | | |
|------------|---|-----------|
| | <p>Database Analytics, Text Analytics.</p> <p>Real – Time Analysis: Introduction: Real-time System, Types of Real-time System, Characteristics of Real-time Systems, Real-time Processing Systems for Big Data: Introduction, Data Integration and Analytics, Big Data Engine-Hadoop, Real-time System Architecture, Real-time Data Analytics.</p> | |
| III | <p>Big Data: Hardware, Technology Foundations: Introduction, Big Data Stack, Virtualization and Big Data.</p> <p>Understanding NoSQL and Hadoop Ecosystem: Introduction, NoSQL: CouchDB, MongoDB, Hadoop Ecosystem – HDFS, HBase, Yarn.</p> | 18 |
| IV | <p>High Dimensional Data: A Big Data Perspective: Introduction – What is Dimensionality? Dimensionality Reduction: Approaches for Dimensionality Reduction, Dimensionality Reduction Techniques.</p> <p>User Interface and Visualization: Desirable Properties, Visualization Techniques.</p> <p>R Programming Basics: Introduction, Data Types, Data Structures and Operators – Basic Data Types in R, R Operators, Vectors, List, Factor, Arrays and Matrix, Data Frame, R Programming Structure – Control Statements of R: if, if-else, if-else ladder, Switch-Case, Return, Loops and Loop Control Statements.</p> | 18 |

| | | |
|--|--|-----------|
| | | |
| V | Interfacing R - Interfacing R to other languages – Parallel R–Basic Statistics– Linear Model– Generalized Linear models–Non-linear Models– Time Series and Auto-Correlation– Clustering. | 18 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/otherstobesolved(Tobediscussed during the Tutorial hour) | |
| Skills acquired from the course | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |
| <p>Learning Resources:</p> <p>1. Big Data Analytics – Concepts, Techniques, Tools and Technologies – First Edition, Dr.M.Thangaraj, Dr. S. Suguna, G. Sudha, PHI Learning Private Limited, Delhi, 2022.</p> <p>Unit I : Chapter 1</p> <p>Unit II : Chapter 2.2.2, 2.2.4, 2.3.2, 2.3.2 Chapter 3 (3.1.1, 3.1.2, 3.2, 3.3.1 – 3.3.4, 3.4)</p> <p>Unit III : Chapter 4 (4.1 – 4.3) Chapter 5 (5.1, 5.2, 5.3.1 - 5.3.3)</p> <p>Unit IV : Chapter 6.1, 6.3</p> | | |

Chapter 7.3
Chapter 8 (8.1 – 8.3)
Unit V : Chapter 8 (8.4 – 8.7)

| THIRD YEAR VI SEMESTER | | | |
|---|--------------------------------------|--|--|
| CourseCode: CC15 | Statistical data Analysis | | Credits: 4 |
| LectureHours:(L) Perweek: 6 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | LectureHours:(L) Perweek: 6 |
| CourseCategory: Elective course | Year: III Semester: VI | AdmissionYear:2023-2024 | |
| Pre-requisite | Basic knowledge of statistics | | |
| LearningObjectives:(forteachers:whatttheyhavetodointheclass/lab/field) | | | |

| <ul style="list-style-type: none"> To learn about the tool SAS, Which is an integrated software suite for advanced analytics, business intelligence, data management, and predictive analytics | | |
|---|---|----------------|
| Course Outcomes: (for students: To know what they are going to learn) | | |
| CO1: To learn about SAS Data Libraries | | |
| CO2: To learn about SAS procedures | | |
| CO3: To learn about SET statement | | |
| CO4: To learn about SAS macro concepts | | |
| CO5: To learn about some specific procedures | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours) | | |
| Units | Contents | Required Hours |
| I | Data step and Proc Step, SAS Data Libraries, Creating dataset using data lines, Importing data using INFILE statement, Importing data using Proc Import, Creating HTML Output, Sub setting observations using conditional statements, Sub setting variables using Keep/Drop, Creating variables using IF-THEN else statements, Retain statement, FIRST. ,LAST., Date functions, Character functions. | 18 |
| II | SAS procedures, Sub setting in Procedures with the WHERE Statement, Sorting Data with PROC SORT, Printing Data with PROC PRINT, Summarizing Your Data Using PROC MEANS, Writing Summary Statistics to a SAS Data Set, Counting Data with PROC FREQ, Producing Tabular Reports with PROC TABULATE, PROC SORT, PROC SUMMARY. | 18 |
| III | Modifying a Data Set Using the SET Statement, Stacking Data Sets Using the SET Statement, Interleaving Data Sets Using the SET Statement, Combining Data Sets Using a One-to-One Match Merge, Combining Data Sets Using a One-to-Many Match Merge, Merging Summary Statistics with the Original Data, Writing Multiple Data Sets Using the OUTPUT Statement, Changing Observations to Variables Using PROC TRANSPOSE. | 18 |
| IV | SAS Macro | 18 |

| | | |
|--|---|-----------|
| | Concepts,SubstitutingTextwithMacroVariables,CreatingModularCode with Macros, Adding Parameters to Macros, Writing Macros with Conditional Logic,Writing Data-Driven Programs with CALL SYMPUT. Proc SQL, Using Proc SQL to createtables,Modifyingtables,Aggregatingtables, Stackingand Mergingtables. | |
| V | PROCUNIVARIATE,PROCMEANS,PROCCORR,PROC PLOT,PROCFREQ,PROCTTEST,PROCNPART,PROCANOVA,PROCREG,PROCARIMA. | 18 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper) | Questionsrelatedtotheabovetopics,fromvariouscompetitiveexaminationsUPSC/TRB/NET/UGC– CSIR/GATE/TNPSC/otherstobesolved(Tob ediscussedduringtheTutorialhour) | |

| THIRD YEAR VI SEMESTER | | | |
|---|---|--|--------------------------------------|
| CourseCode: EC7 | Machine Learning | | Credits: 3 |
| LectureHours:(L) Perweek: 5 | TutorialHours: (T)perweek | LabPractice Hours: (P)perweek | Total:(L+T+P) Perweek: 5 |
| CourseCategory:Elective course | Year: III, Semester: VI | | AdmissionYear: 2023- 2024 |
| Pre-requisite | Basic Knowledge on Networking | | |
| <p>LearningObjectives:(forteachers:whatttheyhavetodointhe/class/lab/field)</p> <ul style="list-style-type: none"> • To provide strong foundation on fundamental concepts in Computing Intelligence • To apply basic principles of Artificial Intelligence and solutions that require problem solving, influence, perception, knowledge representation and learning | | | |
| <p>CourseOutcomes:(forstudents:Toknowwhatttheyaregoingtolearn)</p> <p>CO1:Describe the fundamentals of artificial intelligence concepts and searching techniques. CO2: Develop the fuzzy logic sets and membership function and defuzzification techniques. CO3:Understand the concepts of Neural Network and analyze and apply the learning techniques CO4: Understand the artificial neural networks and its applications CO5: Understand the concept of Genetic Algorithm and Analyze the optimization problems using GAs.</p> | | | |
| Recap:(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours) | | | |
| Units | Contents | | RequiredHours |
| I | Introduction to AI: Problem formulation – AI Applications – Problems – State Space and Search – Production Systems – Breadth First and Depth First – Travelling Salesman Problem – Heuristic search techniques: Generate and Test – Types of Hill Climbing. | | 15 |
| II | Fuzzy Logic Systems: Notion of fuzziness – Operations on | | 15 |

| | | |
|---|---|-----------|
| | fuzzy sets – T-norms and other aggregation operators – Basics of Approximate Reasoning – Compositional Rule of Inference – Fuzzy Rule Based Systems – Schemes of Fuzzification – Inferencing – Defuzzification – Fuzzy Clustering – fuzzy rule-based classifier. | |
| III | Neural Networks: What is Neural Network, Learning rules and various activation functions, Single layer Perceptions, Back Propagation networks, Architecture of Back propagation (BP) Networks, Back propagation Learning, Variation of Standard Back propagation Neural Network, Introduction to Associative Memory, Adaptive Resonance theory and Self Organizing Map, Recent Applications | 15 |
| IV | Artificial Neural Networks: Fundamental Concepts – Basic Models of Artificial Neural Networks – Important Terminologies of ANNs – McCulloch-Pitts Neuron – Linear Separability – Hebb Network. | 15 |
| V | Genetic Algorithm: Introduction – Biological Background – Genetic Algorithm Vs Traditional Algorithm – Basic Terminologies in Genetic Algorithm – Simple GA – General Genetic Algorithm – Operators in Genetic Algorithm. | 15 |
| Extended Professional Component (is a part of internal component only, Not to be included in the External | Questions related to the above topics, from various competitive examinations UPSC/TRB/NET/UGC – CSIR/GATE/TNPSC/other to be solved (To be discussed during the Tutorial hour) | |

| THIRD YEAR VI SEMESTER | | | |
|-------------------------------|--|---|-----------------------------------|
| Course Code: EC-8 | Practical: Statistics Data Analysis Lab | | Credits: 3 |
| Lecture Hours: (L) | Tutorial Hours: (T) per week | Lab Practice Hours: (P) per week : 5 | Total: (L+T+P) Per week: 5 |
| Course Category: Core | Year: III Semester: VI | | Admission Year: 2023-2024 |

| | | |
|--|---|-----------------------|
| Pre-requisite | Basics of Statistics & Excel | |
| Learning Objectives: (for teachers: what they have to do in the class/lab/field) | | |
| <ul style="list-style-type: none"> To learn about the tool SAS, Which is an integrated software suite for advanced analytics, business intelligence, data management, and predictive analytics. | | |
| Course Outcomes: (for students: To know what they are going to learn) | | |
| With SAS software, you can complete these tasks: | | |
| CO-1: Access data in almost any format, including SAS tables, Microsoft Excel tables, and database files. | | |
| CO-2: Manage and manipulate your existing data to get the data that you need. For example, you can subset your data, combine it with other data, and create new columns. | | |
| CO-3: Analyze your data using statistical techniques ranging from descriptive measures like correlations to logistic regression and mixed models to sophisticated methods such as modern model selection and Bayesian hierarchical models. | | |
| CO-4: Present the results of your analyses in a meaningful report that you can share with others. | | |
| CO-5: The reports that you create can be saved in a wide variety of formats, including HTML, PDF, and RTF. | | |
| Recap: (not for examination) Motivation/previous lecture/relevant portions required for the course)[This is done during 2 Tutorial hours] | | |
| Units | Contents | Required Hours |
| | <ol style="list-style-type: none"> 1. Import Data using SAS 2. Apply filtering techniques on Data Set in SAS 3. Draw Histogram for Data Set in SAS 4. Import Excel files into SAS 5. Perform Summary Statistics in SAS 6. Create Decision Trees using SAS 7. Using SAS calculate the means of several specified variables, limiting the output to two decimal places. 8. In SAS use PROC MEANS to calculate means for an entire dataset or by grouping variables. <p>Use two grouping variables and you want to produce a series of histograms to</p> | 75 |

| Learning Objectives | | | | | | | | | | | |
| LO1 | To understand the basic concepts of numbers | | | | | | | | | | |
| LO2 | Understand and apply the concept of percentage, profit & loss | | | | | | | | | | |
| LO3 | To study the basic concepts of time and work, interests | | | | | | | | | | |
| LO4 | To learn the concepts of permutation, probability, discounts | | | | | | | | | | |
| LO5 | To study about the concepts of data representation, graphs | | | | | | | | | | |
| UNIT | Contents | | | | | | | No. of Hours | | | |

| | | |
|------------------------|---|--------------------------|
| I | Numbers-HCF and LCM of numbers-Decimal fractions-Simplification-Square root and cube roots - Average-problems on Numbers. | 6 |
| II | Problems on Ages - Surds and Indices - percentage - profits and loss - ratio and proportion-partnership-Chain rule. | 6 |
| III | Time and work - pipes and cisterns - Time and Distance - problems on trains -Boats and streams - simple interest - compound interest - Logarithms - Area-Volume and surface area -races and Games of skill. | 6 |
| IV | Permutation and combination-probability-True Discount-Bankers Discount – Height and Distances-Odd man out & Series. | 6 |
| V | Calendar - Clocks - stocks and shares - Data representation - Tabulation – Bar Graphs- Pie charts-Line graphs. | 6 |
| Total | | 60 |
| Course Outcomes | | Programme Outcome |
| CO | On completion of this course, students will | |
| CO1 | understand the concepts, application and the problems of numbers | PO1 |
| CO2 | To have basic knowledge and understanding about percentage, profit & loss related processings | PO1, PO2 |
| CO3 | To understand the concepts of time and work | PO4, PO6 |
| CO4 | Speaks about the concepts of probability, discount | PO4, PO5 |
| CO5 | Understanding the concept of problem solving involved in stocks & shares, graphs | PO3, PO6 |
